Module 8

The changes that I made to my file organization were to me, the simplest and most obvious changes to make.

I made a folder for each module, then places all the files required for that module in the folder. This way should I have to go back and change anything, I have all of the files associated with this module in one place.

I checked each link personally and was able to successfully rename all of them with no problems. If all modules could be like this, I would be a very happy student!
