

Module 5 Rationale

The Home/Bio page of module 5 will include a brief bio as well as any pertinent information that visitors may like to see. This is also the landing page of my site and will be the starting point of navigation.

The Writing and Photography pages of my site are identical in layout. For the photography page, I would like to have scaled down versions of images that when clicked on, will expand to their full size. I would like something similar for the writing page with the exception that perhaps only the name of the work appears and then by clicking on that image, the full text pdf comes up. I'm still working that part out.

The Resume page will simply display the pdf of my current resume that can be clicked on and saved or printed within seconds.

The Contact Me page will have any and all pertinent contact information. New professional use Twitter, Facebook and LinkedIn accounts will be created to facilitate those professional connections.
